

Contents

Preface *iii*

1. Public Water Systems *1*

2. Operator and Owner Responsibilities *3*

3. Basic Science Concepts *5*

Chemical Characteristics of Water *5*

Biological Characteristics of Water *15*

Hydraulics *17*

Electricity *22*

Mathematics *31*

4. Public Health Protection *39*

SDWA *39*

Contaminants *40*

Sampling Technique *50*

Reporting /Recordkeeping *52*

Public Notification *52*

Public Relations *54*

Security *54*

Emergency Planning *55*

5. Water Sources *56*

Surface Water Sources *57*

Ground Water Sources *57*

Ground Water Dynamics *59*

Artesian Aquifers *62*

Locating Water Wells *63*

Springs *63*

Dug Wells *64*

GWUDI *64*

Drilled Wells *65*

Source Protection *67*

6. Pumps *70*

Positive Displacement Pumps *71*

Variable Displacement Pumps *71*

Pump System Appurtenances *74*

7. Storage	76
Atmospheric Tanks	76
Tank Controls	77
Pressure Tanks	78
8. Distribution	80
Pipes	80
Meters	84
Hydrants	85
Valves	86
Hydraulics	89
System Layout	89
9. Cross-Connections and Backflow Prevention	92
Public Health Significance	93
Backflow Prevention Devices	95
10. Safety	99
Lifting	99
Electrical Safety	100
Construction	100
Confined Space	102
Chemicals	102
Fires	103
11. Water Treatment	105
Disinfection	105
Corrosion Control	114
Ion Exchange	116
Reverse Osmosis	116
Filtration	116
Activated Carbon	117
Aeration	117
Glossary	119
Acronyms	136
NeRWA Contact Information	137
